

Week 6 - In Class Assignment

Name _____ Score /10

a-c: Find the products:

(1 pt each)

a. $1,500 \times 30 =$ _____

b. $4,000 \times 60 =$ _____

Write the numerical expression (1 pt)

c. 5 times the sum of 3 and 4 = _____

f. Explain with complete sentences how knowing $4 \times 6 = 24$ helps you find $4,000 \times 60$. (3pts pts)

e-f: Complete the table using your understanding of place value and knowledge of rounding to estimate the product. (2pts each)

Expressions	Rounded Factors	Estimate
Example $3,409 \times 73$	$3,000 \times 70$	210,000
d. $6,873 \times 19$	_____	_____
e. 23×3487	_____	_____
