Score _____

1. Lila collected the honey from 3 of her beehives. From the first hive she collected $\frac{1}{4}$ gallon of honey. The last two hives yielded $\frac{1}{3}$ gallon each.

a) *How many gallons of honey did Lila collect in all? (4 points)*

b) *After using some of the honey she collected for baking, Lila found that she only had $\frac{3}{4}$ gallon of honey left. How much honey did she use for baking? Support your answer using a diagram, numbers, and words. (4 Points)*

2.

Find the missing numerator. (3 points)

$$\frac{4}{5} = \frac{\quad}{15}$$

3.

Add (3 points)

$$\frac{5}{8} + \frac{1}{4} =$$

4.

Add (3 points)

$$\frac{3}{5} + \frac{1}{2} =$$

5.

Subtract (3 points)

$$1 \frac{1}{5} - \frac{1}{3} =$$
